PROFESSIONAL SUMMARY

Java Full Stack Developer with a strong foundation in Java, Object-Oriented Programming, JDBC, MySQL, REST APIs, Spring Boot, JavaScript, ReactJS, HTML, CSS, and Bootstrap. Hands-on experience developing database-driven applications, implementing backend business logic, integrating APIs, building responsive interfaces, debugging applications, and working in Agile-oriented environments. Experienced with AI-powered applications using Python, Flask, RoBERTa, NLP, OCR, speech-to-text, and SQLite3.

TECHNICAL SKILLS

Programming: Java, C, Object-Oriented Programming, Collections, Exception Handling

Backend: JDBC, Spring Boot, REST APIs, Node.js, Express.js

Frontend: HTML5, CSS3, JavaScript, Bootstrap, ReactJS, React Native

Databases: MySQL, SQLite3

AI & Data: Python, RoBERTa, NLP, Tesseract OCR, Google Speech-to-Text, Cosine Similarity

Tools: Git, GitHub, VS Code, Eclipse

Core CS: Data Structures & Algorithms, DBMS, Object-Oriented Programming, API Fundamentals

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER INTERN | EduSphere Software Training and Development Institute Pvt. Ltd.

- Developed a Cricket Tournament Management application using the MERN stack, including SQLite3, Express.js, React, and Node.js.
- Implemented backend business logic, database integration, data handling, and application components for core tournament workflows.
- Built frontend components using HTML, CSS, JavaScript, Bootstrap, and React while integrating frontend and backend functionality.
- Debugged application issues, improved stability, and supported performance improvements through iterative testing.
- Worked in an Agile-oriented environment with task breakdown, iterative development, and continuous improvements.

PROJECTS

SMART GOVERNANCE – RoBERTa-Based Petition Analysis & Grievance Tracking | 2026

Technologies: Python, RoBERTa, Flask, React Native, SQLite3, Tesseract OCR, Google Speech-to-Text

- Designed and developed an AI-powered e-governance platform for automated petition classification, grievance tracking, and multi-department routing.
- Integrated a fine-tuned RoBERTa NLP model to classify petitions into departments including Water, Roads, and Health.
- Implemented multimodal input for typed text, scanned/handwritten documents using Tesseract OCR, and voice input using Google Speech-to-Text API.
- Implemented cosine similarity-based duplicate detection and sentiment-based urgency scoring to identify critical cases and support escalation reminders.
- Developed a citizen-facing tracking portal with real-time email status updates and an administrative analytics dashboard for department KPIs and grievance trends.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering | 2026

Mailam Engineering College, Mailam | CGPA: 8.2 / 10

Higher Secondary Certificate (HSC) | 2022

79%

Secondary School Leaving Certificate (SSLC) | 2020

94.6%

CERTIFICATIONS

- Full Stack Web Development – EduSphere Solutions
- SQL – Wipro TalentNext Program
- Java – Anudip Foundation
- Diploma in Programming C

ACHIEVEMENTS & LEADERSHIP

- Secured First Prize in an Inter-College Technical Event, demonstrating analytical and technical problem-solving skills.
- Won First Prize in an Intra-College Technical Competition for technical presentation and implementation.
- Served as Overall Coordinator for College Symposium, leading team coordination, planning, and execution of technical events.
